

AL2000 Uni Panel

Uni panel:

Uni panels are the best solution for casting columns or stop-ends. Holes raster of 5 cm allows to vary column cross section size from 20 to 80 cm. Frames are made of aluminium, that is the reason why they are very easy to handle.

Sizes: 270 x 90cm
135 x 90cm

Column formwork:

- Only universal fixing bolts and combi plates are required to connect AL2000 panels (16 pc. if panel height is 270cm, 8 pc. if panel height is 135cm)
- Column cross section in raster of 5cm from 20 up to 80cm
- Height extension up to 5,4m possible
- Concrete pressure up to 60kN/m²

Attention: Unused holes should be closed with brown plastic plugs for Uni panels

- 1** Cross section profile with anchor holes
- 2** Functional cross section profile
- 3** Connection tube
- 4** AL2000 Uni panel
- 5** Universal fixing bolt
- 6** Combi plate

For further information see Assembly and Usage Instruction System 2000 formwork

Description

AL2000 Uni Panel 270/90 with Phenolic-ply
 AL2000 Uni Panel 135/90 with Phenolic-ply
 AL2000 Uni Panel 270/90 with Plastic-ply
 AL2000 Uni Panel 135/90 with Plastic-ply
 Combi plate DW15 galvanized
 Universal Fixing Bolt galvanized
 Plastic Plug ø24mm brown for Uni Panels
